

ABQ Zone Incident Management Team

Despite dry conditions Goodwin fire exhibits minimal growth Goodwin Fire Morning Update for August 11, 2025

Fire Information Phone: 928-218-4240 (8 a.m. – 8 p.m.)

Media Information Phone: 602-463-8530 (8 a.m. – 8 p.m.)

Acres: 1,010

Start Date: August 6, 2025

Cause: Lightning

Location: 12 Miles SW of Bylas, AZ

Personnel: 111

Fuels: Short Grass, brush, and juniper

Containment: 0%

Operations: The Goodwin Fire showed minimal growth yesterday despite hot, dry, and windy conditions. Additional resources arrived to support various divisions and assist in securing accessible edges. Crews worked along Tribal 64 Road to extinguish hot spots on the fire's edge and will continue today, focusing on securing the southeast flank and moving west.

Firefighters are scouting rugged terrain across the fire to identify potential control lines, improve existing road systems, and address remaining hot spots. Aerial resources conducted reconnaissance flights yesterday, and a Type 1 helicopter will be available today to assist with cooling hot spots as needed.

Weather: High-based showers and thunderstorms producing very little rain are expected to linger in the area on Monday, with primary threats to the fire area continuing to be lightning and gusty and erratic outflow winds from nearby or passing showers. Temperatures will cool off by another 1–2 degrees, but still remain above normal for this time of year.

Safety: The health and safety of firefighters and the public are always the top priority. Members of the public are advised to avoid the Goodwin Fire area. A Temporary Flight Restriction (TFR) is in effect over the Goodwin Fire: https://tfr.faa.gov/tfr3/?page=detail_5_4508. Unmanned Aircraft Systems (UAS), such as drones, pose a serious risk to firefighting and can cause air operations to cease. The public is reminded, if you fly, we can't!

Smoke: Smoke may be more visible due to increased fire activity. For individuals sensitive to smoke, please visit <https://fire.airnow.gov/>.
